

HYDROTHERMAL SYNTHESIS REACTOR UNIT

Zeolites & Microporous

☆Specifications

- Design Pressure : 3MPa
- Design Temperature : 200°C
- Material : SUS304 / PTFE

☆Main features

- It is superior in the uniformity of the temperature inside during the synthesis reacting and in the detachment of the contents.
- It is possible to perform testing for plural different materials of contents at one time (2-12 kinds of materials). Hence, that is good for comparison experiment.
- Easy to operate.

Within W1200×D750×H1700mm
AC100V15A/AC100V1A

within W1200×D750×H2000mm
AC100V15A×2/AC100V1A×2

SUS304 / PTFE
50ml / 100ml / 150ml / 200ml / 300ml
